CAMERA-Type

Fast Scans!

Quick Autofocus!

International Patent Pending

"No looking at the screen!"
Point the laser at the barcode and SCAN.
(No distracting camera-images on the screen.)

Ultra High-Speed Scanning through your Camera!

- New Barcode Reader holds its own against dedicated terminals!
- Fast scans with the app and module provide an easy solution!
- Low cost implementation.
- Use in high-use situations with tens-of-thousands of scans per charge.

PROBLEMS with OTHER camera-barcode-scanners:
- Slow/inconsistent scanning
- Can't focus well

Laser module	Work goes smoothly now that looking at the screen is unnecessary.
